## PRESS RELEASE: DRIVE PRODUCTS BECOMES NATIONAL DISTRIBUTOR FOR STELLAR INDUSTRIES

We're thrilled to announce that Drive Products has become a Canadian distributor for Stellar Industries across our national branch network. This announcement follows our recent acquisitions of ORO Design and MacFarlands Truck & Utility in 2023, who for many years have been supporting and representing Stellar in Ontario and in the Atlantic Canada markets respectively.

This strategic partnership aligns seamlessly with our commitment to offering a diverse range of high-quality truck bodies and equipment to our customers, both new and existing. Stellar's exceptional product offerings will enhance our portfolio and provide versatile solutions to the diverse markets we serve. This includes Construction and Utilities where Stellar is considered an industry leading brand.

As we continue to expand, we're eager to promote the Stellar brand throughout Canada from our rapidly growing network of 22 upfitting locations and to further support aftermarket parts and service.
